About Us

YOUCON is an innovative engineering solution provider with comprehensive expertise in construction services. We support clients in executing and completing high-complexity projects across various industries in Indonesia and the region. From civil infrastructure development and manufacturing to mining, power, and oil & gas, YOUCON delivers excellence by leveraging the collaborative support of experienced multidisciplinary experts and dynamic young professionals.

Our commitment at YOUCON is to provide the finest engineering and construction services to deliver impactful results for our clients. Recognizing that our environment demands concrete preservation initiatives, we ensure that every step of our construction process including strict and responsible waste management protocols safeguards environmental stability to promote sustainable growth and a better future.

Our Vision

"As a leading provider of **world-class engineering** and construction services in Indonesia, YOUCON offers **extensive expertise, youthful innovation, and steadfast support to make a significant impact** across various industries."

Our Mission

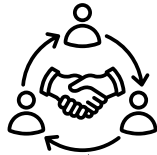

- Deliver top-tier engineering and construction services driven by innovation and progressive methods.
- Invest in the continuous growth of our dynamic talents our youth and most valuable asset.
- Consistently exceed client expectations by delivering exceptional, future-ready results.
- Cultivate a healthy, positive, and secure work environment for all our teams.
- Commit to executing projects strictly on schedule with uncompromising attention to detail and quality.
- Combine deep local insights with world-class global expertise.

Core Values

Integrity

Integrity is the unshakeable bedrock of every engineering and construction operation we undertake.

Health, Safety, and Environment (HSE)

In executing complex projects, safeguarding the absolute well being of our workforce, partners, and the environment is our highest priority.

Quality

Uncompromising quality drives the forefront of our construction solutions.

People

Our dynamic talents are the core engine driving our success in the construction industry.

Sustainability

Forward-thinking sustainability is the blueprint that guides our approach to every project.

Our core values determine **our innovative engineering** and **high-quality construction services**. They encourage us to value integrity, prioritize health and safety, empower our people, and support sustainable development in every project. We embrace these values to create lasting value for our clients, stakeholders, and the environment, thereby strengthening our reputation as a trusted engineering and construction company.

Building Construction **OFFICE BUILDING**

Building modern, efficient, and inspiring workspaces tailored to support your business growth and professional needs
